## Vintage Camera

*Design and Instructions  
by the BrickNerd Team*

Capturing a moment in time by looking through a viewfinder and pressing a shutter will never get old – even though for many of us time has moved on and we now use our mobile phones for the same purpose.

But what better way to take a trip down memory lane than building a classic camera?

The BrickNerd team has designed a small callback to this iconic companion of the past: a cute little vintage camera, complete with a viewfinder, a shutter knob and a lens.

There's some fancy sideways building going on to capture some of the iconic curves that should make for an interesting model. Oh, and did we mention that you can build it in teal? What a treat!

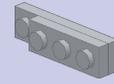

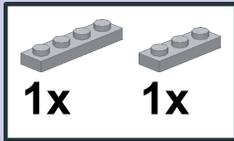

This was a fun little model to design – we hope you'll enjoy building it just as much as we did designing it!
