Microscope

Design by the BrickNerd Team

For this microscale model, we wanted to create a microscope to reveal the secrets of the mini world around us. The core of the microscope uses a sturdy, white, double inverted slope more common to plane sets.

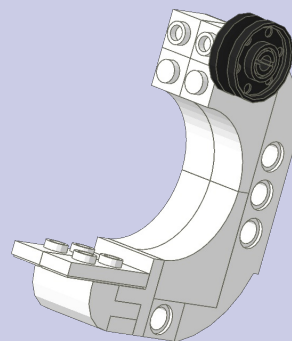

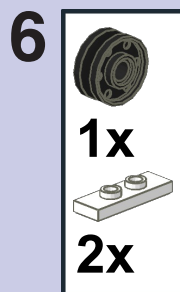

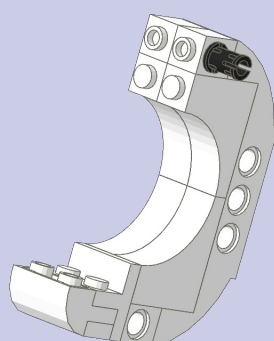

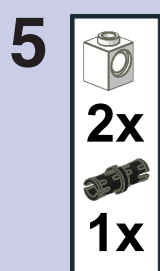

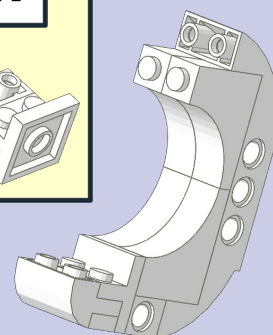

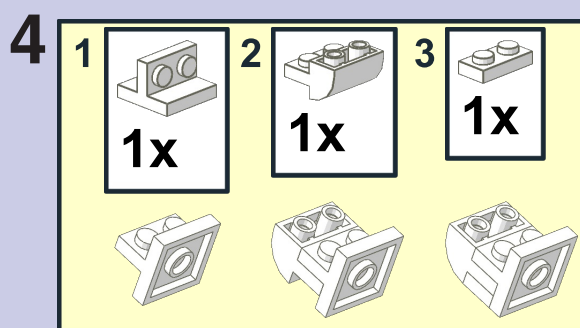

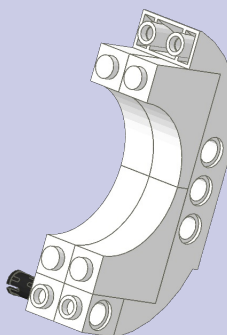

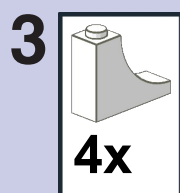

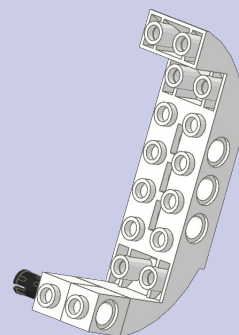

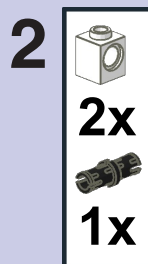

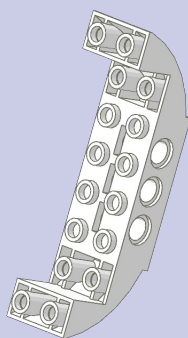

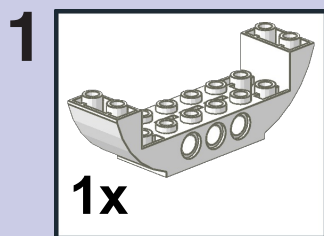

The teal accents and base mimic the look of a real laboratory microscope with black highlights to make the color pop in comparison. The adjustable focus knobs are made with vehicle wheels. Look out for a secret BrickNerd easter egg on the viewing platform!

So start building your own LEGO microscope. Who knows what amazing discoveries await just beyond the lens?
